

VIIDA™ Products Clean & Care Maintenance

Standard Safety Precautions

Usage of product for anything other than handling and displaying food or beverages is NOT recommended; and

Do not allow children to chew on or swallow any parts.

Precautions Before Use

Remove the outer sleeve and lid.

Soak the stainless steel product in cold water.

Add a spoonful of vinegar per cup of water.

Boil for 10 minutes.

Wash the product thoroughly with a soft sponge and dishwashing detergent.

***Note:** if you are unable to remove the outer PP sleeve, rinse the outer layer with warm water and wait until the product has evenly heated for easy removal.

Precautions After Use

Use a soft cloth when cleaning;

***Wire scrubbers and metal scrapers may damage the product.**

Wash stainless steel and outer sleeve separately with a sponge while applying natural and/or mild detergent and remove water;

***There may be a white residue after cleaning, this is caused by minerals in your tap water.**

Wipe the surface completely dry with a clean, dry cloth before storing to prevent irremovable water spots.

Warning During Use

For Stainless Steel Parts

Antibacterial stainless steel prevents bacteria growth, but does not prevent the growth of bacteria on the food stored within;

DO not put products in the microwave. The stainless steel will block the heat from warming food or beverages and can damage your microwave;

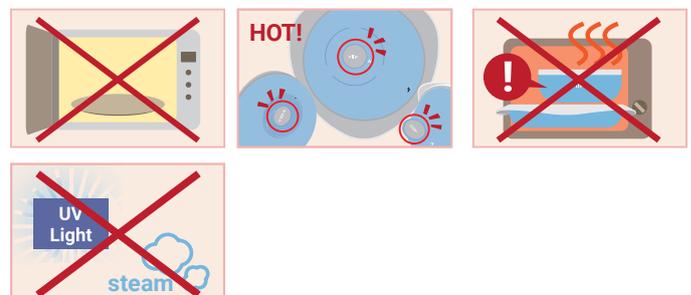

When handling heated food and beverages, please avoid direct contact with the exposed stainless steel on the bottom to avoid burns.

Always wear gloves to prevent contacting hot stainless steel with bare hands.

For Polypropylene Parts

Do not put polypropylene sleeve into an oven as it will damage the products.

Do not use UV light or steam to clean the PP outer sleeve.
